

7503 6-LEAF SPRING, Replacement

Works as a replacement for factory 4-leaf and 5-leaf, or can be used in a mono-leaf to multi-leaf conversion. On mono-to-multi conversions, be aware that multi-leaf springs are wider at the mounting point than the original mono-leaf and will fit snugly in the mono-leaf perch, requiring alteration of multi-leaf mounting cushions. See our axle-mounting kits (heading 7454) for the proper hardware and cushions. Front eye bushing comes pre-installed. May have to remove 1-2 bottom leaves (the shortest ones) for fit and height correctness. \$15.00 per spring is required for shipping, not eligible for free shipping.

7503 LEAF SPRING KIT, Performance, Hotchkis

Hotchkis gives you a new way to look at leaf springs. Their kit includes everything needed to swap out your tired stock springs for a performance ride with a 1-1/2" drop over stock ride height. It starts with a pair of multi-leaf springs with a progressive spring rate for better performance driving, a pair of heavy duty rear shackles with polyurethane bushings (front-eye bushings are rubber), 4 polyurethane waffle cushions, 4 U-bolts, and grade 8 hardware for a complete installation. Due to the heavy weight of this kit, a \$35.00 shipping charge will be added, not eligible for free shipping with a \$300 order.
